Personal Qualities:

A disciplined and responsible web developer. Always strive to self-education. I know how to manage time and appreciate it. I like non-trivial tasks. Constantly increasing my skills in English.

Last Project’s Description:

During the last time, I have been working on two exciting projects. The first of them was a social network which based on React JS. I created all pages like (credit page, profile page, homepage, login page and other), also multi forms, using BEM and components approaches.

The second project was creating landing pages and email letter for VeePN.

Links to some commercial projects in which the frontend was executed by me:
